

Musical Instrument

Music sparks and develops all areas of child development and skills including intellectual, motor, language, social-emotional and overall literacy. It helps the body and the mind work together.

Trusity's **GUITAR** and **KEYBOARD** lessons are dedicated for developing the love for music in learners while positively impacting their brain development, memory and abstract reasoning skills. It is also aimed to make children feel happy and stress-free thereby positively impacting their growth.

Our experienced tutors customise and deliver the program basis knowledge and skill level of each individual learner.
